

# FreedomWiFi®

If you've ever been a part of planning an event or trade show you've probably seen the rates some venues charge for basic internet connectivity. It is not uncommon to receive five-digit quotes for WiFi access for a brief 1-3 day event. Venues will often use 'Free WiFi' as a bargaining chip to secure your event's other service needs and to deter you from bringing in your own outside preferred vendors. FreedomWiFi® from DataPoint puts you back in control of the conversation by providing a standalone internet option completely free from the in-house and their 'Free WiFi' tactics.

## KeyFeatures

- 📶 Bonds multiple LTE connections from the top U.S. carriers.
- 📶 Bonded speeds typically 4x the speed of a single connection (*150 Mbps max*)
- 📶 Freedom from the in-house - ***NO venue permission required (FCC Part 15 Compliant)***
- 📶 Network reporting and analytics available
- 📶 **No last minute order penalties!**
- 📶 Deployment options available for multiple areas
- 📶 Plug & play deployment - quick and easy setup
- 📶 Unlimited Data Included

Dimensions	12" x 9.25" x 6.625"
Weight	9 lbs (32 lbs shipping weight)
WAN Interface	4x Embedded LTE Modems + 2 GigE RJ45 WAN Ports
LAN Interface	7 RJ45 GigE (10/100/1000) Ports
WiFi	Dual Band 2.4GHz and 5GHz 802.11a/b/g/n/ac 3x3:3 MIMO
Wireless Security	WPA/WPA2
Recommended Users	50-500*
Bonded Speeds	Up to 150 Mbps (Typically 20-80 Mbps down; 10-40 Mbps up)
Power Input	Standard 100-240V ~50-60Hz
Power Output	Three 802.3af PoE Outputs
Power Consumption	38W (max)
Network Addressing	DHCP
